Shane Kerr <[shane@isc.org](mailto:shane@isc.org)>  
Internet Systems Consortium  
(ISC)

# Presentation Outline

- Background & Motivation
- Goals & Features
- Status

# What is BIND?

- DNS server software
  - Authoritative
  - Recursive
- Used by 80% of DNS servers
  - Not 80% of *domains*
  - Not 80% of *queries*

# Where Did BIND 9 Come From?

- Designed to solve BIND 8 problems
- Heavy emphasis on security
- Reference implementation for DNS

# Motivation for BIND 10

- BIND 9 is almost 10 years old
- The computing world has changed
- The networking world has changed
- DNS software “marketplace” evolved
- Need a new architecture for the next 10+ years

# BIND 10 Project

- ISC sought funders for BIND 10
- Generous sponsors provided initial funding:  
<https://www.isc.org/bind10/sponsors>
- Initial sponsors formed:  
*BIND 10 Steering Committee*
- Official kick-off date 2009-04-01

# (Rough) BIND 10 Timeline

- Year 1: Authoritative-only server
- Year 2: Recursive server
- Year 3: Fully functional server
- Year 4: Drop-in BIND 9 replacement
- Year 5: *Really* fun stuff

# Presentation Outline

- ✓ Background & Motivation
  - Goals & Features
  - Status

# BIND 10 Technologies

## Architecture & Design:

- Modularity
- Well-defined APIs and libraries
- Full runtime control

## Features:

- Customization
- Resilience to failures
- Cluster support

## BIND 10 Process Model

# Flexible Data Sources

- Zone files (of course)
- SQL (of course)
- BDB (Berkeley DataBase)
- LDAP
- File system
- djbdns?

*...generic data sources!*

# When you say “SQL”, what do you mean?

Motivations for SQL are varied...

- Out-of-memory data source
  - Reduced system requirements
  - Faster load time
- Integration with existing SQL systems
  - Custom provisioning systems
  - Single database for network information
- We bought an SQL database!

# Captive vs. Free SQL

- “Captive” SQL
  - BIND “owns” the SQL database
  - Allows for efficient caching
  - Simplifies IXFR, DDNS
- “Free” SQL
  - BIND is one user of an SQL database
  - Other users may update the database
  - Limited caching possible
  - Complicated data synchronization

# Recursion Improvements

Not our current goal, but some ideas...

- Cache persistence
- Shared caches
- Recursive lookup tracing
- DNSSEC debugging & control

# Presentation Outline

- ✓ Background & Motivation
- ✓ Goals & Features
- Status

# Development

- BIND 10 development is *public*
  - <https://bind10.isc.org>
  - [bind10-dev@lists.isc.org](mailto:bind10-dev@lists.isc.org)
  - Public Subversion repository
- BIND 10 team coding away
  - 5 ISC staff
  - 2 JPRS staff
  - 4 CNNIC staff

# Status

- Prototype authoritative server DONE!
- Y2-r01 DONE!
- Y2-r02 scheduled for 2010-06-10
